RATIONALE:

As the Regional Agri-Aqua Innovation System Enhancement (RAISE) Program in Central Luzon advances its mission to develop innovation ecosystems among State Universities and Colleges (SUCs) and Research and Development Institutions (RDIs), the need to capacitate institutional personnel in end-to-end intellectual property (IP) management becomes increasingly significant. In particular, Project 1: Intellectual Property and Technology Business Management (IPTBM) seeks to empower Consortium Member Institutions (CMIs) to identify, protect, and commercialize locally generated technologies.

A core component of this process is patent prosecution, which allows inventions to progress from filed applications to fully granted patents. However, many institutions encounter substantial challenges in this area, especially when responding to Office Actions issued by the Intellectual Property Office of the Philippines (IPOPHL). These documents frequently include technical and legal objections that must be addressed with precision, clarity, and alignment with IPOPHL's procedural standards.

Limited institutional capacity to respond to such reports often leads to delays in the prosecution timeline and affects the broader goals of protecting innovations and preparing them for potential commercialization.

This three-day workshop directly addresses this need by offering structured, practical, and outcomes-oriented training on how to prepare and submit effective written responses to IPOPHL Office Actions. It supports the overall implementation of the RAISE Program by strengthening the competencies of IPTBM personnel in handling both legal and procedural aspects of patent prosecution. By developing personnel capable of handling this critical phase, the program also contributes to increasing the number of granted patents among participating CMIs.

Through case-based instruction and the completion of an individually written Office Action response as a final output, the workshop promotes both technical skill development and institutional self-reliance.

OBJECTIVES:

This workshop aims to enhance the capacity of intellectual property (IP) personnel from Consortium Member Institutions (CMIs) in Central Luzon by developing their competencies in patent prosecution, particularly in crafting responses to Office Actions issued by the Intellectual Property Office of the Philippines (IPOPHL). Specifically, the activity intends to:

1. Provide participants with an understanding of the structure, content, and legal basis of issued Office Actions;
2. Strengthen the ability of participants to interpret and respond to both formality and substantive examination reports based on the IPOPHL Manual for Patent Examination Procedure (MPEP); and
3. Equip participants with practical skills and strategies in drafting technically and legally sound responses to patent-related Office Actions; and

EXPECTED OUTPUTS:

1. At least 22 participants trained for patent prosecution;
2. At least eleven (11) Office Action responses developed; and
3. One (1) regional training report .

TARGET PARTICIPANTS AND ATTENDEES:

- Two (2) representatives from each Consortium Member Institution (CMI) under the RAISE Central Luzon Program
- RAISE Program officials and staff
- Representatives from the Philippine Council for Agriculture, Aquatic and Natural Resources Research and Development (PCAARRD)
